APPLE MESSAGES FOR BUSINESS Migration Request

Company: Ramp

SUBMITTED BY: Linq

Use case:

Ramp is a corporate card and spend management platform. Finance teams issue cards, set policy, and Ramp chases the paperwork automatically, covering receipts, memos, missing documentation and out-of-policy transactions. Most of that chasing happens by notification to the employee who swiped the card.

Ramp runs on Linq today and additionally uses RCS for Business, where rich media links don't load and the process feels like an SMS flow. Linq requests approval to migrate Ramp onto Apple Messages for Business under Linq's registration.

50,000+	**5–15M**
BUSINESSES SERVED	PROJECTED MONTHLY VOLUME

At a glance

THE EXPERIENCE. A spend assistant in Messages. Employee taps a card, gets a message asking for the receipt, attaches a photo in the thread, confirms the category, done. Out-of-policy spend gets a quick yes or no. Approvals route to managers in-thread.

WHY IT FITS. Receipt capture needs the attachment lifecycle. Approvals need Quick Replies. Anything touching spend data needs authentication before it's shown. Category selection is a List Picker. The whole workflow is short, repetitive and high-frequency, exactly what the channel is good at, and badly served by email and RCS for Business.

VALUE TO USERS. No app-switching to close out an expense. The receipt takes fifteen seconds instead of sitting in an inbox for a week. Managers approve from the lock screen.

AUDIENCE. Employees and finance teams at 50,000+ businesses, mostly US, mostly desk-and-mobile professionals. Heavy iPhone skew in the segment.

Components

APPLE COMPONENT	HOW RAMP WOULD USE IT
Attachments	Receipt capture in the thread.
Quick Reply	Approvals, and yes or no on out-of-policy spend.
Authentication	Required before spend data is shown.
List Picker	Expense category selection.

Company

Founded 2019, New York. Roughly 2,400 employees.

Funding Around $3B raised across 15 rounds. Series F in June 2026: $750M at a $44B valuation, led by ICONIQ, GIC and Ontario Teachers'. Reported in early talks as of September 2026 on about $1B more at a $60B valuation.
