Ramp: Apple Messages for Business, Issues to Fix

Consolidated view of the Messaging Advisory review and the second internal review of the Ramp recording (18 September 2026). Draft ratings for internal agreement before anything is sent to Ramp.

Prepared by Messaging Advisory | Built 9 October 2026 | 6 Fail · 20 Caveat · 8 Not shown: Mandatory · 9 Not shown: Recommended · 5 Apple will ask

Fail

TIME	TEST	ISSUE	FIX
0:02	**B1: Approved button**	Entry point is a text suggestion, not Apple's button	Use Apple's Message Us button and record the tap on it
0:06 to 0:13	**C1: First reply in 5 seconds**	First reply is over 5 s by either measure (7 s from send, 5.3 s from delivery); no indicator for the first 4 s	Send the indicator and greeting at once on the first message; target under 3 s
1:15	**B3: Service naming**	Ramp settings screen labels the channel iMessage	Rename it Apple Messages and keep that screen out of the take
2:55 to 3:10	**G11: Agent uses rich features**	Agent asks yes or no questions as plain text	Use a Quick Reply: Yes, lock it / No, keep it active
3:51 to 4:23	**D1: Indicator before every message**	No typing indicator before the MUTE, pause, START and STOP replies (confirmed at 5 fps)	Add a 1 s indicator in the keyword handler
3:53	**E4: Escape option**	Pause picker has no way out	Add Keep messages on as a fourth option

Caveat

TIME	TEST	ISSUE	FIX
0:00 to 0:03	**A1: Real journey**	Starts on qa.ramp.com, then a blank redirect page	Record from the live Ramp web app or mobile app
0:02	**B2: Call to action**	Entry text does not say what the customer can do	Add a line such as Submit receipts and get card alerts
0:02	**B4: Prominence**	Entry only appears after tapping the search field	Show the entry without a tap first
0:16	**E10: Clear copy**	Second welcome message is a keyword list	Merge into one welcome; move keywords behind HELP
0:20 to 1:38	**X0: Outside the plan**	Ask an expense question becomes Ask a question	Use one label in every menu
0:21 to 3:47	**D3: Reply latency**	Five bot replies took 7 to 12 s	Bring every reply under 5 s
0:46 to 0:48	**D2: Bot indicator length**	One bot indicator ran about 3 s	Keep bot indicators to about 1 s
0:49	**E10: Clear copy**	Policy answer is one very long bubble with no source	Lead with the answer, split into short messages, say whose policy
1:01 to 1:09	**I5: Silence after close**	Card alert lands 3 s after You're welcome!	Add a lead in or record the alert as its own scene
1:14 to 1:22	**A6: Clean screen**	Photo library shows QA tools and other recordings; a colleague's work email is visible at 1:18	Use a clean album and remove the email
1:21	**X0: Outside the plan**	Receipt is visibly test data	Use a real or clearly fictional receipt
2:02	**G3: Transfer announced**	Transfer announced without a reason	Say why the customer is being connected
2:02 to 2:15	**G4: Wait time**	Shortly, then in just a moment; no wait time	Give a wait time in the first message; keep the queue position
2:25	**H2: Clarifying question first**	No yes or no question before asking for card digits	Ask Is this about a card on your Ramp account? first
2:36 to 3:31	**A5: Continuous take**	About 5 s missing from the take	Record in one continuous take
3:10	**I1: Clear resolution**	Replacement card promised without the customer agreeing; address and timing never confirmed	Ask before reissuing and confirm where it goes
4:02 to 4:13	**E10: Clear copy**	Pause offers RESUME, but START replies resubscribed	Use one name for the pause and confirm a resume as a resume
4:23	**H7: Trigger words**	Unclear whether STOP ends support chats or only alerts	Say what STOP covers in the reply

TIME	TEST	ISSUE	FIX
Whole	**A2: Rich features**	Feature list not supplied; only two features shown	Send the feature list with the recording
Whole	**B6: Brand header**	Header shows placeholder name and icon	Set Ramp name and logo in Apple Business Register

Not shown in recording: Mandatory

TEST	NOT SHOWN	WHAT TO ADD
A4 / G9: Out of hours	Out of hours message not recorded	Ask for a person outside hours and show the stated reply time
B8: Always available	Entry point not shown outside business hours	Show the entry point in the out of hours clip
C6: Handles misunderstanding	Bot never shown failing to understand	Send one off topic message and show the fallback
G2: Keywords	AGENT and HELP advertised but not typed	Type each once and show the result
H7: Trigger words	MENU and RESUME offered but not typed	Type each once and show the result
H7: Opt out and return	START is sent before STOP, so return after STOP is never shown	Send STOP, show silence, then START
RL1 to RL4: Rich links	No URLs sent by bot or agent	Send one link and show the rich link preview
Security codes	Promised in the welcome but never shown	Show the security code flow, or drop it from the welcome

Not shown in recording: Recommended

TEST	NOT SHOWN	WHAT TO ADD
Options not tapped	Submit a receipt, Talk to a person button, I'm all set, two pause options	Tap Talk to a person from a menu at least
AT1 / AT2: Business attachments	No file or image sent by Ramp; the icon at 1:32 is a receipt emoji	Send one image or file from Ramp if attachments are in the feature list
G8: Agent to agent transfer	No transfer between agents	Show one if Ramp uses it
LP1 to LP4: List Picker	List Picker not used	Show it if in the feature list
TP1 to TP4: Time Picker	Time Picker not used	Show it if in the feature list
FM1 to FM6: Form	Form not used	Show it if in the feature list
AP1 to AP4: Apple Pay	Apple Pay not used	Show it if in the feature list
AU1 to AU3: Authentication	No sign in bubble; how card actions are verified is unclear	Show it, or explain the verification Apple will ask about
IA1: iMessage app	iMessage app not used	Show it if in the feature list

Apple will ask

QUESTION	WHAT WE SAW	WHAT RAMP NEEDS TO TELL US
H6: Card alert consent	Card alert pushed at 1:09; no opt in shown	How customers opt in to card alerts in Messages
Live agent response time	23 s from handoff (2:02), 30 s from request (1:55)	The target first response time for live agents
Verification for card actions	Only the last 4 digits are typed before lock and reissue (2:43)	How customers are verified, and whether the app session is signed in
Expense policy source	Bot quotes a $70 daily cap, $100 in high cost hubs, 20% tips, receipts from $75 (0:49)	Whether these are Ramp defaults or the customer's company policy
Replacement card	Replacement promised at 3:10 with no address or timing	Delivery details and how consent is captured
